

Automation Doesn't Replace The Players It Changes The Game

Trinity AX Series

Automated Pallet Systems for CNC Machines

AX Series Key Benefits:

- Optimize High-Mix CNC Production
- Increase Spindle Utilization
- Reduce Your Set-Up time
- Run Unmanned Night & Weekend Shifts
- Maximize the Floor Space of Your Shop
- Simple Interface & Easy Integration

“You’re Not Replacing Anyone; You are Gaining 8-10 Hours a Day... It’s a Game Changer.”

Jose Fernandez, Owner JF Precision

JF Precision is known for quick lead times. They needed to automate to keep up with demand but worried about losing devoted workers in the process. After speaking with other AX owners, JF purchased an AX2, gained 8-10 hours a day of unattended production, & no one lost their job. “My guys love it,” Owner Jose Fernandez said, “it’s a game changer.”
