Trinity AX4

Automated Pallet System for
Medium/Large CNC Machining Centers

SPECIFICATIONS

- Configurations: AX4-12 / AX4-18
- Max Part Size: $\varnothing 21.5"$ x 14"H / $\varnothing 21.5"$ x 8"H (+ Bonus \varnothing)
- Pallet Locations: 12 / 18
- Robot Capacity: 160 lbs.

FEATURES

- Fanuc R-1000iA Robot
- 15" touch screen with Trinity AXPM Software
- Pallet designed for 3 clamping modules
- Single pallet operator station with rotating receiver
- Complete CNC table setup including:
 - Receiver with a single clamping module
 - Integration onto CNC table
 - Clamp confirmation for pallets
 - Controls package with clamp confirmation detection
 - Blow offs for contact surfaces
- Integrated Fanuc OEM 220 VAC, 3 phase transformer
- CNC machine integration
- Safety fence with sliding door and auto-door installation
- System crating and preparation for shipment
- System installation and operator training (5 days)

107"

Designed & Built in California

AX SERIES KEY BENEFITS

- Optimize high mix CNC production
- Decrease set-up time via stored workholding
- Eliminate idle time between part loads
- Increase spindle utilization
- Maximize the floor space of your shop
- Ensure repeatability with smart workholding & software
- Run unmanned night & weekend shifts
- Easy to use interface
